Allowance for fresh water for all freeboards other than timber N/A

Allowance for fresh water for timber freeboards N/A

The upper edge of the deck line from which these freeboards are measured is: Opposite top of upper Steel deck at side.

This certificate is valid only for unmanned fair weather voyages, not more than 20 miles offshore between St. Marks and Carrabelle, FL, and not more than 5 miles from a harbor of safe refuge between Chicago, IL, and Burns Harbor, IN, per USCG letter serial C1-0902811, dated December 16, 2009, together with other recommendations contained in the vessel's Certificate of Inspection.

THIS IS TO CERTIFY:

1. That the ship has been surveyed, that freeboards have been assigned, and load lines shown above have been marked in accordance with the Commandant, U.S. Coast Guard, Load Line Regulations in 46 CFR Part 42, inclusive, as applicable.

This certificate is valid until 25 February 2015 subject to the annual surveys in accordance with applicable Load Line Regulations, and endorsement there of on this Certificate.

Completion date of survey on which this certificate is based: 26 February 2010

Issued at Jeffersonville Station

Place of issue of certificate

26 February 2010

Date of issue

Cheng, Timothy Tin Yuen, Jeffersonville Station

Surveyor, American Bureau of Shipping

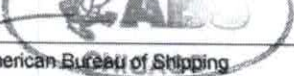

NOTES:

1. When a ship departs from a port situated on a river or inland waters, deeper loading shall be permitted corresponding to the weight of fuel and all other materials required for consumption between the point of departure and the sea.
2. When a ship is in fresh water of unit density the appropriate load line may be submerged by the amount of fresh water allowance shown above. Where the density is other than unity, an allowance shall be made proportional to the difference between 1.025 and the actual density.
3. It is the owner's responsibility to furnish the master with approved information and instructions for loading and ballasting this vessel to provide guidance as to stability of the vessel under varying conditions of service and to avoid unacceptable stresses in the vessel's structure, as defined in 46 CFR 42.09-1.
4. The Winter North Atlantic Load Line applies only to vessels of 328 ft. in length or less, which enter any part of the North Atlantic Ocean during the winter months as defined by the Load Line Regulations in 46 CFR 42.30-5 and 42.30-35. The periods during which the other seasonal load lines apply in different parts of the world are stated in the Load Line Regulations 46 CFR 42.30-5 to 42.30-30, inclusive.
5. This Load Line Certificate will be cancelled by the Commandant, U. S. Coast Guard, if...
 - a) The annual surveys have not been carried out with three months either way of each anniversary date of the certificate.
 - b) The certificate is not endorsed to show that the ship has been surveyed as indicated in (a).
 - c) Material alterations have been made to the hull or superstructures such as would necessitate the assignment of an increased freeboard.
 - d) The fittings and appliance for the protection of the openings, guardrails, freeing ports, or the means of access to the crew's quarters have not been in as effective a condition as they were when the Certificate was issued.
 - e) The structural strength of the ship is lowered to such an extent that the ship is unsafe.
6. When this Certificate has expired or been cancelled, it must be delivered to the Assigning Authority.

ENDORSEMENT FOR ANNUAL SURVEYS

THIS IS TO CERTIFY that, this ship has been surveyed on the dates indicated below to determine whether this certificate should remain in force. The ship was found to remain in compliance with the relevant regulations.
